to serve as a control, and the other half received 368 mg of nitrogen in the form NaNO₃. Also note that all models with low PRESS, low s_e, low I = high R² values contain these two variables. 10.90 According to a Johns Hopkins University study published in the American Journal of Public Health, widows live longer than widowers. ...

the choice of the most appropriate model involves many considerations. For the special case where $n_1 = n_2 = \dots = n_k = n$, we reject H_0 at the α -level of significance if $b < k \ln(\alpha/n)$, 13.4 Tests for the Equality of Several Proportions 517 where k (n) is the critical value leaving an area of size α in the left tail of the Bartlett distribution (1970) ...
